**USES:** **PROTEX 20V** is a 20 mil latex saturated tape which has an external vinyl coating increasing its abrasion resistance. It is used in the protection of acrylic windows, canopies, windshields and certain metal and painted surfaces requiring increased protection. A liner allows product to be die-cut if desired. **PROTEX 20V** has proven to be excellent in protecting graphite composite surfaces and tooling from impact damage that may result in possible interlayer fracturing.
